Judge Emerson argued two cases in the St. Louis Court of Appeals last week. This week he is attending Washington county Harris Caroline circuit court.

The election for directors of the Academy of Music was held last Monday, and Dr. T. Johnston E A R. Goulding, F. Rodach, Wm. Hills, Geo. Schultz, and A. Roehry were chosen.

At the school election yesterday about six- Kelley Mrs Violet ty votes were cast. W. G. Fairchild and Dr. Lashly Lum G. W. Farrar were chosen directors for three years. Length of school eight months.

Steffens and Rieke will give a big excursion picnic about the first of June. A big delegation will be down from St. Louis. Will give more particular notice hereafter.

Dr. Farrar's article, "Remedy for Strikes," was crowded out of last week's issue, but will be found in this. In this connection it is proper to state that it was written before the matter was taken up in Congress, and its points of resemblance to O'Neal's labor bill are not borrowed therefrom. We commend it to the careful attention of the public.

Judge Emerson, of Ironton, has announced bimself as a candidate for Judge of the Twenty-sixth Judicial Circuit. The Judge is a man of fine legal ability and we would be pleased to see him elected. He is well known all over the State, and seated on the bench he would give dignity and prominence to the Twenty-sixth Circuit. - Cape Girardeau

Democrat. We suggest that the public school should not be made a vehicle for advertising shows -not even of the gospel sort. "Dr." Wilsor had no more right to so use it than would the"Georgia Minstrels"or the "Chicago Comedy Company." The public school is, theoretically, at least, utterly divorced from church and show. Let the school directors see to it that it is made so in reality.

As we go to press we learn of the death this morning at seven o'clock, of Mr. J. Grandhomme of this place. He had been seriously ill for several weeks, but for several days had improved considerably, and his convalescence was not deemed improbable. To "R. P. T."-Why didn't you say more about bangs? Bangs are a nuisance. A ruffianly conduct in others; provided only at night in the spring-time, and the fish never-to-be-forgotten obstacle interfering that the latter are related to or belong to a with the sight both of the beholder and wearer; the former because he cannot see the beauty which lies in that high [forehead; the latter because she can not see clear with her hair flying around so near her eyes. The from bangs is by hiding some imperfection, such as a "cow-lick" or low forehead, and even then the lower the forehead the worse the bangs look. And if every girl with a "cow-lick" wears bangs, how is one to know but what all the girls who wear bangs have "cow-licks?" But worst of all is cutting off little girls' hair to form bangs. I do hate to see their hair just ruined. "But if a woman have long hair it is a glory to her." I believe in keeping it looking as pretty as possible without cutting it or causing any uncomfortable feeling. And now I will pass on to the little bonnet. I beg of you, Uncle, spare the little bonnet. Why, I have a "love of a bonnet" made with two horseshoes and a pigeon-wing which I consider far superior to a "cart-wheel of a hat." Though, to be sure, the horse-shoes are very small and so is the pigeon-wing. But, as for going bareheaded, that is not to be thought of. Why, when I wear that bonnet I can wear a thick veil, scarf and shawl all over it at once, which I cannot conveniently do with a hat; I know by experience. Yet, for all that, I very often substitute my bood for the bonnet. How did they keep a dozen-no, two doz -

Let's see; I baked four pies Saturday, and two yesterday, and one was baked today; that makes seven gone in four days, and still you men say pies are not so good as they used to be. Ah! the fault is in your taste, for the pies still go. But I am afraid mine would not be very fresh at the end of a week, Alcorn. though I never saw one of them a week old. As to your being drunk, I do not believe it, showing all due respect to your veracity. It was a mistake; you were sick, overheated. Nevertheless, I can not bear to see any lone

Dear Arta-I did not dare say all I thought about bangs, for I had no language to express my thoughts in regard to them that would look well in a paper, and I thank you for coming to my aid. Now about those pies. Those great, large English houses had large cellars under them, dry and cool, as the soil is gravelly or sandy land free from moisture. So it was the custom to keep all eatables in those cellars in boxes, closets, etc. And what a pie-eating people those New Englanders were. Pie on the table ev-

Ed. Register .- During the big snow a few weeks ago, I took my ax on my shoulder, got on my horse, and started for the bills rabbit-hunting, not thinking but that they were as plentiful as in the days of long ago when you could see as many deer and turkies in one day as you do in a year now. In panion-caught five rabbits, and saw but two deer-tracks and those of a flock of turkies. I was in Ironton last week, Mr. Editor, Had I taken such a tramp as on that day forty years ago, I would not have thought to Dr. Lucas, Goodwater, is very frequently a day, and several turkeys for a relish. I have heard sportsmen say that deer do not care for the running. But I know bet; ter, and a man who depends upon his hound to drive his game to him-like an ox to the slaughter-is no bunter. If he can not take his gun and go to the woods and find his own deer, he is no hunter. In olden times, if a man kept a pack of hounds and let them chase a deer a time or two, he was waited upon by his neighbors and given to understand that he had better keep those hounds out of the woods. Other people have rights as well as those who own the dogs. So it is with fish in the streams. I can remember when our streams were full of fish, and in curely packed and shipped on the spring the water would be alive with them; but now, how is it? You can hardly catch a shiner; and the cause? And so it might be now, if tain class of people to keep all they have and donia, one way by which I whiled away the time while riding was to count the deer and turkies on the roads—I could not keep count of the squirrels if I had tried ever so hard. At certain times in the day the woods would be alive with them, racing on the ground, up the trees, through the branches, and evhard fight between them and the farmers as to who should have the corn when it first came up. We sometimes had to poison corr shooting them that I sometimes wished there much like work. One day I had become very tired shooting, and was very thristy besides; my old hunting tutor told me always to take my gun-never to leave it out of reach-always keep it where I could lay my hand on it-for I never knew what might come along so I got over the fence, which was near the reek, and lay down at the edge of the water to get a drink, laying my gun at my side. Just as I was putting my lips down to drink I heard a noise; glancing up, I saw a deer running towards me on the other side of the creek. It stopped and looked back. I put out my hand and drew my rifle to my face
